The screenshot shows a mobile application interface for reporting a safety issue. At the top, there is a header with a warning icon (a lightning bolt in a triangle) and the text "REPORT A SAFETY ISSUE" and "STEP 2 OF 6". Below the header, the main heading is "Where is the Safety Issue?". Underneath, there is a text prompt: "Drag map to adjust location or enter a location description." A map is visible in the background, but it is partially obscured by a white dialog box. The dialog box has a title: "Report an Issue Would Like to Use Your Location". The body of the dialog box contains the text: "We only access your location when you report an issue to PG&E." At the bottom of the dialog box, there are two buttons: "Don't Allow" and "OK". Below the map, there is a text input field with the placeholder text "LOCATION ADDRESS / DESCRIPTION OF LOCATION". The input field contains the text "1234 Main Street, Oakland, CA 67890". Below the input field, there is a section titled "For example:" followed by two example text strings: "1234 Main Street, Oakland, CA 67890" and "Equipment on the corner of Capital Boulevard and Main Street". At the bottom of the screen, there is a large yellow button with the text "NEXT".
